                                                                                                                                                                                        CC protein (IL-17RLP). IL-17RLP is a homologue of the IL-17 receptor and has CC a wide range of cytokine receptor-like activities. IL-17RLP or its CC agonists may be used to enhance host defenses against resistant chronic CC and acute infections, e.g. mycobacterial infections, via the attraction CC and acute infections of microbicidal leukocytes. It may also be used to increase T-cell proliferation by stimulating IL-2 biosynthesis, for the CC treatment of T-cell mediated autoimmune diseases and lymphocytic CC leukaemias. IL-17RLP may also be used to regulate hematopoiesis and to Ct treat sepsis. Extracellular IL-17RLP domains may be used as antagonists CC iIL-17RLP. TL-17RLP agonists and antagonists can also be used to modulate IL-6 expression, useful in treatment of cancers such as CC myclomas, plasmacytomas and hybridomas and Lennert's Lymphoma. The CR present cDNA sequence encodes human IL-17RLP. This cDNA sequence was C derived from sequencing the HAPOR40 cDNA clone (ATCC deposit
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      16-SEP-1998;

```

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     NOTE:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        NOTE: This is a 'working draft' sequence. It currently consists of 14 contigs. The true order of the pieces is not known and their order in this sequence record is
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       105150 105249: gap of 100 bp in length 105250 106522: contrig of 1273 bp in length 106523 106622: gap of 100 bp in length 106623 108946: contrig of 2324 bp in length 108947 109046: gap of 100 bp 109046: gap of 1712 bp in length 109047 110758: contrig of 1712 bp in length
